

Down the

Floor drains and Storm drains account for 51% of our water pollution!  
\$1,463,709,677.00, down the drain (at \$125 per barrel) every year!

**Are we all STUPID paying that much to pollute our water?**

Petro Barrier Systems Inc. has the answer.

[Petro Barrier System's Floor Drain Protector](#), protects small floor drains, as in garages, elevator shafts, manufacture areas, transformer vaults, parking areas, basements, etc.

[Petro Barrier System's Floor Drain Protector](#) will allow water to flow through the drain as usual. However, utilizing our patented **Muir Lock Monster Technology** the [Floor Drain Protector](#) will remove any grease or oil that would have otherwise gone down the drain along with the water. If a spill of oil runs to the drain, the [Floor Drain Protector](#) forms a plug to prevent any leakage of oil into the drain. Oil cannot get through the [Floor Drain Protector](#). Thus preventing contamination of our streams, rivers, lakes and ocean an expensive clean up and a possible environment fine.

These environment protection products are easy to install, a 3-inch [Floor Drain Protector](#) has been designed to simply slide into a standard 3-inch pipe drain, likewise a 4-inch [Floor Drain Protector](#) will easily slip into a 4-inch diameter pipe drain. Floor drains can be found in automotive, truck and bus repair garages, most industrial and warehouse buildings have many, underground parking, in bottom pit of each elevator shaft, in each hydroelectric transformer vault and at least one in your home basement and your garage. One drip of oil stopped by a [Floor Drain Protector](#) will assist in the longevity of clean water for future generations.

[Petro Barrier Systems Inc.](#) has develop an exclusive return and recycle program for each [Floor Drain Protector](#) that becomes plugged by doing its job by stopping every drop of hydrocarbon that tries to pass through it. Each returned [Floor Drain Protector](#) is disassembled, the **Muir Lock Monster Technology** materials are processed as hazards wastes and the parts are clean and recycled into replacement [Floor Drain Protector](#).
